- 1 Work the checklist in order.** Each step builds on the one before it — your EIN, address and phone number should match everywhere.
- 2 Keep business and personal finances separate.** Run all business income and expenses through your business bank account.
- 3 Open your first tradelines.** Start with Net-30 vendor accounts and a credit-builder tradeline, and pay every invoice on time or early.
- 4 Monitor your business credit.** Use NAV to watch your D&B, Experian and Equifax business profiles as they build.
- 5 Get a funding strategy.** Once your foundation is in place, book a free consultation and we'll map your path to capital.
